THE TURKS

Fail to Reply to the Powers, in the Matter of an Armistice.

A Civil Government is Being Set Up in Thessaly by Turkey—The Greek Fleet Has Established a Blockade on the Gulf of Volo.

LONDON, May 14.—The Turk is obstinate. The powers demand an armistice while they patch up a peace, but the wished-for affirmative from Constantinople does not come. The Turkish armies are being strengthened, a Turkish civil government is being set up in Thessaly as if the Turks meant to keep the province, and everything is put in readiness for a march on Athens.

Meanwhile the Greeks will wait breathlessly for a determination of their fate. All their military operations are at a standstill or worse. The army at Domoko is suffering acutely for lack of food and actual starvation is threatened.

LONDON, May 14.—The Greek-Turkish news received Thursday does not change the situation. Everything is facing on the port's action. There is no confirmation of the report printed by the Journal of Paris that an armistice has been arranged, but the silence from the seat of war seems to indicate that Edhem Pasha's advance on Domoko may have been countermanded. The sultan's position is little stronger than King George's, and, therefore, it is not surprising that, while the war feeling is so strong he hesitates at taking a step which could be construed at Constantinople as a surrender of Ottoman interests. In addition to this, the fact that the feast of Bairam begins Thursday, lasting until Sunday, offers another excuse for delay.

CONSTANTINOPLE, May 14.—An official dispatch from Larissa dated from that place Wednesday morning, announces that six battalions of Turkish infantry from the east and from Larissa, four battalions from Diskata and four battalions from Janina, are marching on Kalambaka, northwest of Trikala, where they will shortly be joined by the Turkish armies from Janina and Ellassona.

LONDON, May 14.—A telegram received here from Athens Thursday says that the Greek fleet has established a blockade on the Gulf of Volo.

ATHENS, May 14.—A dispatch from Arto says that the Greek troops under Col. Bairactaris are advancing upon Philippiades and have occupied the town of Isaret. The Turks have fallen back to Salopoulo.

ATHENS, May 14.—In the course of an interview Thursday M. Delyannis, the former premier, criticised the evacuation of Crete without compensation, and declared that Greece would never pay indemnity to Turkey. He added: "If any such proposal is submitted to the legislative assembly it will certainly be rejected."

FATAL QUARREL.

One Man Dead, One Dying and Others Badly Wounded.

SAN AUGUSTINE, Tex., May 14.—Two negroes on the farm of George and Felix Johnson, white, went to the latter's house and renewed a quarrel previously begun. Other members of the Johnson families interfered. When the fight ended it was found that Theodore Nobles was suffering from two gunshot wounds. He died in a short time. George Johnson was struck on the head with a gun. He is insensible and his condition is precarious. Aaron Johnson was wounded in three places. Felix Johnson was shot in the arm and leg. Wm. White, one of the two attacking negroes, had his skull fractured and was also shot through the body. A posse is searching for his son, the other negro, who is also wounded.

Snowstorms in Europe.

LONDON, May 14.—Heavy snowfalls and severe frosts continue in all parts of Austria and Hungary. There have been avalanches in the Austrian Tyrol and the Saazkammergut. In some parts of Styria and in Silesia and Tesven the people are sledging. Great damage has been done everywhere to crops, vines and fruits. The branches are breaking with the weight of the snow, which is three feet deep on the mountains of Corinthia. Telegraphic and telephonic communication is interrupted. Sheep and game are perishing, and there have been earthquake shocks near Graz, Fiume and elsewhere. A large quantity of snow has fallen in the Italian province of Udine.

Lily Langtry Divorced.

SAN FRANCISCO, May 14.—The divorce suit of Mrs. Langtry, the "Jersey Lily," came up Thursday at Lakeport, the plaintiff having acquired a residence in the state. The evidence consisted entirely of depositions taken in London. There was no opposition, and the judge granted the plaintiff a divorce. Nothing sensational was developed. Desertion was the ground on which the decree was sought and granted.

A Memorial Building.

PARIS, May 14.—The Gaulois announces that Comte Vastellane has written a letter to Baron Mackau, informing him that the comtesse has decided, in memory of her mother, to devote a million francs to the purchase of a site and the erection of a building to be used for all kinds of charitable purposes.

The Florida Deadlock.

TALLAHASSEE, Fla., May 14.—Raney withdrew from the senatorial race Thursday. The ballot resulted: Chipley, 47; Stockton, 41; Hoeker, 9; scattering, 2. Fifty necessary to a choice. The Chipleyites tried for another ballot but there was opposition and adjournment followed.

McKinley Will Visit the Exposition. NASHVILLE, Tenn., May 14.—President John W. Thomas, of the Exposition Co., received a letter Thursday from President McKinley stating that he would visit the Centennial exposition on Ohio day in June.

BLOODY BATTLE

Near Griboro—Two Brigades of Greeks, With Many Guns, Attack the Turks.

ARTS, May 14.—Desperate fighting has been in progress all day near Griboro, on the road to Filipiada. Two brigades of Greeks with many guns, two companies of sappers, and a squadron of cavalry, attacked the Turks who were almost without artillery. The Greeks forced the first Turkish line of defense but met with a stubborn resistance at the second. In several places the bayonets were so close to the cannon that they (the bayonets) could not be used. Already 500 of the Greeks are hors de combat. The battle still continues as this dispatch is being sent.

At 9 p. m. fighting at Griboro has ceased and the Greeks have occupied various heights in the neighborhood. Twenty-five officers and 400 men are hors de combat. The battle will be resumed Saturday.

Since 4 o'clock p. m. the gunboat flotilla has been attacking Nicopolis from inside the gulf of Ambraesia, with a simultaneous attack proceeding from the land side. The Turkish batteries replied vigorously and firmly resisted the attack. The coming on of darkness stopped the engagement.

All the Greek efforts are now concentrated upon capturing Nicopolis and Preveza before advancing to Pentephiadia.

LONDON, May 15.—The correspondent of the Times at Athens says:

"The resumption of offensive operations in Epirus greatly complicates the situation and tends to hamper the negotiations for peace. The evident intention of the Greek commanders is to capture the Turkish positions there in order to show that they have not been defeated."

"In an interview Friday M. Ralli, the premier, repeated his statement that humanitarian motives are responsible for the advance in Epirus, but he did not deny the advantages which might be hoped for from the capture of Preveza and the occupation of the adjoining Turkish territory."

"We are still at war," he said, "and until an armistice is concluded Greece retains her liberty of action. We can not allow our activity to be confined to Thessaly, where the Turks are preponderant. The powers have hindered us from acting in Crete, but Greece can not be barred everywhere, nor compelled to restrict her operations to a limited area."

"We have done our best to obtain an armistice, and until it is accorded we must act where and when we can. If we have not already prosecuted the war at various points and among the islands of the Aegean, it is only because we have taken into consideration the sufferings to which the Greek population might be subjected."

"The government apparently thinks that a renewal of the war will hasten, instead of retarding the armistice. This calculation may prove to be correct, but it is more likely that Turkey will seize upon it as an excuse for delaying the armistice and will deal a crushing blow in Thessaly."

LONDON, May 15.—The Constantinople correspondent of the Daily Telegraph says: The sultan, acting upon the advice of Emperor William, has declared to M. Camdon, the French ambassador, that he can not agree to granting an armistice until the basis of peace has been decided upon and approved by him.

UMPIRE'S DECISION

Causes a Small Riot at Kansas City—The Umpire Roughly Handled.

KANSAS CITY, Mo., May 15.—Friday's game between Kansas City and Milwaukee terminated in a small sized riot. After a game of hard hitting and ragged fielding, Milwaukee won in the ninth on a doubtful decision by Umpire Graves, which resulted in an immediate uproar. Fred Lake, catcher for the Blues, assaulted Graves, knocking him down, and immediately several hundred men swarmed upon the grounds, and Graves was roughly handled, until four policemen came to his assistance. The policemen finally dragged the umpire out through a side gate, thrust him into a wagon standing near by, and escaped from the mob by driving rapidly toward town.

Gets One Year in the Penitentiary.

HELENA, Mont., May 15.—Secretary of the Senate John Bloor, was convicted Friday by a jury of having secreted the "salary bill" to prevent its passage, and the punishment was fixed at one year's imprisonment. He was denied further bail and is now in jail. The bill in question had passed both houses the last day of the session, but was never signed by the speaker of the house. It would have cut down the salaries of the county officers and the number and salaries of the deputies 33 per cent.

Earthquakes in South Australia.

LONDON, May 15.—A special dispatch from Melbourne, Victoria, says that no fewer than 90 earthquake shocks have been felt in South Australia during the last three days. The subterranean disturbances were particularly severe at Kingston, where buildings were damaged and the inhabitants are living in tents for safety.

All Irregulars Dismissed.

LONDON, May 15.—The Vienna correspondent of the Daily News says: Gen. Smolenski has dismissed all the irregulars from his camp, believing that they are responsible for many of the Greek disasters, and he threatens to punish with death any one who intrudes among his troops.

Awarded Permanent Alimony.

NEW YORK, May 15.—Mrs. Mary Isabella Tracy, of 438 Ontario street, Chicago, was awarded, Friday, \$200 a month permanent alimony from this date by Justice Andrews, in the supreme court, in a divorce suit which she brought 19 years ago against her husband, Henry Partridge Tracy, who is now a coffee broker in Chicago.

Church Bicycle Club.

MARION, O., May 15.—To the numerous clubs formed in this city another was organized Thursday night at the Presbyterian church under the name of the Presbyterian Bicycle club.

IN CONGRESS.

Cuban Question Will Receive Considerable Attention in the House.

Conference Report on the Indian Bill—The Morgan Cuban Resolutions Likely to Pass in the Senate—The Pacific Railroad Land Patents.

WASHINGTON, May 17.—The house leaders have not yet decided upon the methods by which they will make their response to the president's message, which will be sent to congress Monday or Tuesday, asking for relief for the starving Americans in Cuba. That the response will be quick and complete, however, there is no reason to doubt. In the present condition of affairs in the house three methods of procedure are open. Ordinarily the message would go to the committee on foreign affairs for consideration, and that committee would report a bill which would come back to the house for action through the regular channels. The speaker could in the present emergency simply appoint this committee and let the whole subject take the regular course. But it is hardly likely that this will be done. The subject is so well understood that it will probably be thought that the members, with the message and the accompanying documents which the president will transmit before them, can act intelligently without a committee report. If the committee is not appointed two other courses will be open. First, after the receipt of the message a bill may be formulated by the leaders and a special order reported by the committee on rules for its consideration. This would bring the whole question at once before the house for action. But this method would be disadvantageous, perhaps, in that both houses, struggling to the same end simultaneously, would act on different bills, thus entailing delay for adjustment of differences in conference. The most likely course is that the house will await the action of the senate if action is had promptly and then consider to senate bill or joint resolution under a special order. The sentiment in favor of recognition of the Cuban insurgents is strong in the house, and a very radical measure might be passed if the house were allowed free action. With a senate measure, dealing only with the question of the relief of the suffering Americans, before the house under a special order, possibility of amendment would be cut off and the house would be compelled to accept or reject it as passed by the senate. The conference report on the Indian bill probably will come before the house this week.

The proceedings in the senate this week are by no means settled. All will depend upon the course the Cuban question may take. Senator Morgan's joint resolution occupies the favored place on the calendar, and there is little doubt that it will be taken up at the appointed hour Monday. Still there is a slight possibility that the expected message of the president may cause a postponement and that the character of his recommendations may have a bearing that will influence the tenor of the resolution that ultimately will be adopted. The conference report on the Indian bill probably will come before the house this week.

With the Cuban question in its present shape and with no other pressing business before the senate the debate on this subject will be of uncertain duration. It may continue practically all the week and it may come to a very sudden and speedy termination. There is little or no doubt that the Morgan resolution will pass when a vote is reached and the indications are that the majority for it will be the greater for the recent delay. There will continue to be some opposition and the plea will be made that any material aid given in accordance with executive recommendation is all that can be reasonably expected.

If Cuba does not occupy the entire attention for the week much of the time is likely to be given to the general calendar. Senator Gear will make an effort to have the Pacific railroad bill considered, while Senator Lodge will, if the opportunity offers, make the same effort in behalf of the immigration bill. Senator Pettigrew will call up the resolution for the investigation of the Pacific railroad land patents. The Indian appropriation bill will be brought in on a conference report. In it there remains only the one point of difference on the Untompahgre lands to be settled. The sundry civil conference probably will be postponed until Senator Allison's return to the city.

Senator Aldrich will make the opening statement in behalf of the tariff bill on the part of the majority of the finance committee on Tuesday, but it will rest with individual senators whether the debate shall be continued beyond this speech at that time. The probabilities are that the statement will produce some badinage and that after this the senate will adjourn until Monday, when the debate will begin in earnest. Senator Aldrich is expected to fully explain the position of himself and colleagues and to make quite an elaborate presentation of the subject.

Charged With Killing His Son.

SEDAIA, Mo., May 17.—Eddy Brink, a 14-year-old boy, was shot and killed on Muddy creek, west of town. The boy's father, W. N. Brink, a well-known Seventh-Day Adventist, of Kansas, has been arrested, charged with the murder, two farmers having stated that they saw the boy and a man, whom they believe to have been his father, engaged in a struggle, which ended in a shooting, after which the man ran away. The Brinks were traveling by wagon from Wamego, Kan., to St. Louis. A Negro woman named Young, whom they picked up, was with them.

TEN MEN KILLED

And Several Injured in a Tennessee Mine Disaster—A New Tiptoe, Thought Safe, Falls, With Terrible Results.

NASHVILLE, Tenn., May 15.—A Florence, Ala., special to the Banner says:

A terrible disaster occurred at Pinkney, Tenn., ore mines, 30 miles from here, Thursday, beginning at 3 o'clock. The new tippie, or ore dump, 60 feet high, fell, killing ten white men and boys outright, and seriously wounding several others. The killed are: Joseph Remington, Cal Kilburn, Will Kilburn, Jim Brown, an 11-year-old son of Jim Brown, Cal Harris, Landin Harris, Richard Hardwick, Mat Crow, Jim Crow.

The seriously injured are: Bill Sims, George Gamble, Cypre Gamble, Alex. O'Dill, Will Kilpatrick, Joe Newton, Donny Brown, two McElmores, M. Christain.

Of the killed, Remington, Cal Kilburn, Brown, Harris and the two Crows leave wives and from one to five children. Those who are seriously injured have broken legs and arms and crushed hip bones, and internal injuries. At least half those who are injured will die, but their names can not be learned. All of the killed and wounded were on the top of the tippie when it collapsed. Only two escaped without serious injuries. One young man, seeing his danger in time, jumped 20 feet to a tree and received slight scratches, and another jumped to the ground, turning over several times and alighted on his feet, only spraining his ankle. The cause of the collapse is unknown. The dump was a new one, and was tested with 20 cars of ore less than a month ago. There was only a small weight on it when it fell. The mines where the disaster occurred belong to J. Craig McLanahan. Drs. Arnold and Bramlette went to the scene on a special train Thursday evening, cared for the injured, and returned Friday morning.

THEODORE DURRANT

Asks For a Pardon on the Ground That the Real Murderer of Blanche Lamont Has Confessed His Crime.

SAN FRANCISCO, May 15.—Theodore Durrant, through his attorneys, asked Gov. Budd Friday to pardon him on the ground that the real murderer of Blanche Lamont has at last confessed his crime. The lawyers declare that they have not been hoaxed, for is it their purpose to impose upon the executive. They insist that in the person of John Rosenberg, convict at San Quentin prison, they have discovered the man who is guilty of the horrors of Emmanuel church.

John Rosenberg has made a sworn confession before a notary public and in the presence of several witnesses that he killed Blanche Lamont at the instigation of a stranger and in consideration of the payment of \$700 for his bloody work. It is with this sensation that the attorneys will strengthen their case at Sacramento. The story and its details is one of the most remarkable that has developed in the long case.

Rosenberg is a Russian sailor and arrived in this city on a sailing vessel from Hamburg, Germany, during the last week of March, 1885, or on the first day of April. He is now serving a term for horse stealing and appears to be sane.

Absolutely no credence is apparently placed by any one, unless by the prisoner's attorneys, upon the alleged confession of convict John Rosenberg, who declared he had murdered Blanche Lamont for \$700 at the instigation of a stranger. Rosenberg was committed to San Quentin prison ten days after Durrant arrived there.

A COMBINATION

Of Wire Nails, Wire and Rod Manufacturers About to Be Formed.

PITTSBURGH, Pa., May 15.—Manufacturers of wire nails, wire and rods are about to form a grand combination to control the market for all three products. The originators of the scheme are the wire nail manufacturers, manufacturers of rods, wire and nails, met in New York a week ago and laid the foundation for the plan of organization. The policy outlined will only include a moderate advance in the price of each product, and not the extortionate prices under the regime of the nail pool.

If the new combination is a go it will practically drive out all competition in the manufacture of wire nails. All the firms which were in the nail pool have signified their willingness to enter the new combination. It is not known whether the Pittsburgh Wire Co. will become a member. This concern was a thorn in the side of the old organization, as was the Bissel interest in Cleveland. The latter before it went to pieces.

Aged Bank Officials Convicted.

MARION, Ill., May 15.—After being out 18 hours, the jury in the case of Col. Wm. R. Brown and W. P. Bruner, indicted for the embezzlement of money deposited in their bank at Maripolis prior to its failure two years ago, brought in a verdict Friday of guilty and fixed the penalty at one year in the penitentiary and a fine of \$410 each. Great sympathy is expressed for the defendants on account of their age, 70 and 82 years. A motion for a new trial was made.

WASHINGTON IN BRONZE.

The Cord Which Released the Veiling Over the Statue of the First Ruler

Of the Republic Drawn by President McKinley, Its Latest Ruler—Many Distinguished Men of the Country Present—Address by the President.

PHILADELPHIA, May 17.—Here, in the city which first placed on his brow the laurel crown of achievement, the memory of George Washington, the soldier, the statesman and the man, was honored Saturday in monumental bronze.

The cord which relaxed the swaddling bands from the figure of the first ruler of the republic was drawn by its latest ruler. Surrounding him were men in whose veins runs the blood of those first patriots who battled shoulder to shoulder with Washington and with him made possible the scene enacted Saturday—a scene conceived and planned by those very comrades in arms; executed by their sons in peace.

It was a notable gathering and representative of the country, including the president, the vice-president and the cabinet officers, its defenders in the officers and privates of the army and navy; and its best blood, in the direct descendants of the moulders and the makers of the nation. Maj. Wm. Wayne, president of the Society of Cincinnati, who formally presented the monument to the city, traces his lineage straight to Mad Anthony; and Wm. W. Porter, the orator of the day, is a grandson of David Rittenhouse Porter, twice governor of Pennsylvania, and a great grandson of Gen. Andrew Porter, who was on Washington's staff in the revolution.

Thus no historic interest was wanting to stimulate enthusiasm. The actual unveiling ceremony was impressively simple. Bishop Whitaker opened with prayer, and Maj. Wayne followed with an appropriate address. Then came the unveiling by President McKinley, and the resultant clamor, augmented by the national salute of 21 guns by the artillery, and by the foreign and American war vessels in the Delaware. This concluded, President McKinley spoke briefly, as follows:

PRESIDENT MCKINLEY'S ADDRESS. FELLOW CITIZENS:—There is a peculiar and tender sentiment connected with this memorial. It expresses not only the gratitude and reverence of the living, but is a testimonial of affection and homage from the dead.

The comrades of Washington projected this monument. Their love inspired it. Their contributions helped to build it. First and present share in its completion and future generations will profit by its lessons.

As commander-in-chief of the colonial armies from the beginning of the war to the proclamation of peace, as president of the convention which framed the constitution of the United States, and as the first president of the United States under that constitution, Washington has a distinction differing from that of all other illustrious Americans. No other name can be so closely related to the government. Not only by his military genius—his patience, his sagacity, his courage and his skill—was our national independence won, but he helped in largest measure to draft the court by which the nation was guided; and he was the first chosen of the people to put in motion the new government.

His was not the boldness of martial display or the charm of captivating oratory, but his calm and steady judgment won men's support and commanded their confidence by appealing to their best and noblest aspirations. And withal Washington was ever so modest that at no time in his career did his personality seem in the least intrusive. He was above the temptation of power. He spurned the suggested crown. He would have no honor which the people did not bestow, an interesting fact—and one which I love to recall—is that the only time Washington addressed the convention during all its sessions over which he presided in this city, was for a larger representation of the people in the national house of representatives and his appeal was instantly heeded. Thus he was ever keenly watchful of the rights of the people in whose hands was the destiny of our government then and now.

Masterful as were his military campaigns, his civil administration commands equal admiration. His foresight was marvelous; his conception of the philosophy of government; his insistence upon the necessity of education; his morality and enlightened citizenship to the progress and permanence of the republic can not be contemplated, even at this period, without filling us with astonishment at the breadth of his comprehension and the sweep of his vision.

His was no narrow view of government. The immediate present was not his sole concern, but our future good his constant theme of study. He blazed the path of liberty. He held the foundation upon which we have grown from weak and scattered colonial governments to a united republic whose domains and power as well as whose liberty and freedom have become the admiration of the world. Distance and time have not detracted from the fame and force of his achievements or diminished the grandeur of his life and work. Great deeds do not stop in their growth and those of Washington will expand in influence in all the centuries to follow.

The request Washington has made to civilization is rich beyond computation. The obligations under which he has replaced mankind are sacred and commanding. The responsibility he has left for the American people to preserve and perfect what he secured is exacting and solemn. Let us rejoice in every new evidence that the people realize what they enjoy and cherish with affection the illustrious heroes of revolutionary story whose valor and sacrifice made our nation. They live in us and their memory will help us keep the covenant entered into for the maintenance of the freest government on earth.

The oration was then delivered by Mr. Porter. The formal presentation of the memorial to the city was made by Maj. Wayne to Mayor Warwick, with short addresses by both men, and then the mayor transferred it to the Fairmount Park commission, which exercises jurisdiction over the great pleasure ground.

President McKinley and his distinguished companions reviewed the military parade, and the crowd, when not looking at the troops, reviewed the president and his party.

A Painful Humor

On the Ankle Spread to the Knee and Developed into Boils—No Trouble Since Taking Hood's.

"I was troubled with a disagreeable itching on one of my ankles. In time it developed into boils of which I had five or six at a time. The humor spread from my ankle to my knee and was very painful. It baffled the skill of physicians. For weeks I could not bear my weight on this foot. An abscess formed and was lanced and the humor broke out on my other ankle and threatened to repeat my former experience. Hood's Sarsaparilla attracted my attention and I began taking it. In six weeks I was better, and began to hope for a permanent cure. I took Hood's Sarsaparilla six months and was entirely cured. I have had no trouble with humor since that time." Mrs. M. B. THE COMING MAN.

A pair of very chubby legs,
In a pair of little shoes;
With rather doubtful toes;
A little kilt, a little coat—
Cut as a mother can—
And lo! before us stands in state
The future's "coming man."

His eyes, perchance, will read the stars,
And search their unknown ways;
Perchance the human heart and soul
Will open to their gaze;
Perchance their keen and flashing glance
Will be a nation's light—
Those eyes that now are wistful bent
On some "big fellow's" kite.

Those hands—those little, busy hands—
So sticky, small and brown;
Those hands whose only mission seems
To pull all order down;
Who knows what hidden strength may be
Hidden in their grasp;
Though now 'tis but a trasy stick
In sturdy hold they grasp.

Ah, blessings on those little hands,
Whose work is yet undone;
And blessings on those little feet,
Whose race is yet unrun;
And blessings on the little brain
That has not learned to plan;
Whate'er the future holds in store,
God bless the "coming man."

CAPTAIN GLOSE

BY CAPTAIN CHARLES KING.

[Copyright, 1894, by J. B. Lippincott Co.]

II.—CONTINUED.

"This," said Lambert to himself, "is possibly one of the scrub oaks. I assume he doesn't imagine me to be an officer, and in any event, he could say so and I couldn't prove the contrary. Ergo, I'll let him into the secret without letting him imagine I'm nettled."

"They were made by my tailor, corporal," said he. "He also made the uniform which I, perhaps, should have put on before coming out to camp." ("That ought to fetch him," thought he.) "Where will I find Capt. Glose?"

"He's over there," said the corporal, with a careless jerk of the head in the direction of the opposite wall tent. "Then I suppose you're the new lieutenant the fellows have been talking about?"

"I am; and would you mind telling me how long you've been in service?"

"Me? Oh, I reckon about two months—longer 'n you have, anyhow. You ain't joined yet, have you?" And the corporal was nibbling at a twig now and looking up in good-humored interest. Then, as Lambert found no words for immediate reply, he went on: "Cap's awake, if you want to see him." And, amazed at this reception, yet not knowing whether to be indignant or amused, Lambert sprang down the pathway, crossed the open space between the tents, a dozen of the men starting up to stare at but none to salute him, and halted before the tent of his company commander.

Sitting just within the half-opened flap, a thick-set, burly man of middle age was holding in his left hand a coarse needle, while with his right he was making unsuccessful jabs with some black thread at the eye thereof. So intent was he upon this task that he never heard Lambert's footfall nor noted his coming, and the lieutenant, while pausing a moment irresolute, took quick observation of the stranger and his surroundings. He was clad in the gray shirt and light-blue trousers such as were worn by the rank and file. An ordinary soldier's blouse was thrown over the back of the camp-stool on which he sat, and his feet were enased in the coarse woolen socks and heavy brogans and leathern tongs, just exactly such as the soldier cook was wearing at the hissing fire a few paces away. His suspenders were hung about his waist, and in his lap sat uppermost and showing a rent three inches in length, were a pair of uniform trousers, with a narrow welt of dark blue along the outer seam. They were thin and shiny like bombazine, in places, and the patch which seemed destined to cover the rent was five shades too dark for the purpose. His hands were brown and knotted and hard. He wore a silver ring on the third finger of the left. His face was brown as his hands, and clean shaven (barring the stubble of two days' growth) everywhere, except the heavy "goatee," which, beginning at the corners of his broad, firm mouth, covered thickly his throat and chin. His eyes were large, clear, dark brown in hue, and heavily shaded. His hair, close cropped and sprinkled with gray, was almost black.

The morning air was keen, yet no fire blazed in the little camp stove behind him, and the fittings of the tent, so far as the visitor could see, were of the plainest description. Not caring to stand there longer, Lambert cleared his throat and began:

"I am looking for Capt. Glose."

Whereupon the man engaged in threading the needle slowly opened the left eye he had screwed tight shut, and, as slowly raised his head, calmly looked his visitor over and at last slowly replied:

"That's my name."

III.

Newton Lambert has more than once in the course of his years of service been heard to say that of all the odd sensations he ever experienced that which possessed him on the occasion of his reporting for duty with his first company was the oddest. Accustomed during his four years of cadet life to behave with punctilious respect in the presence of officers, young or old, and accustomed also through his two months' detail at the academy that summer to be treated with even the exaggerated deference which the old non-commissioned officers seemed to delight in showing to young graduates, Lambert was unprepared for the hail-fellow-well-met nature of his reception by the enlisted men and the absolute impassiveness of his one brother officer, that it was utterly different from the customs obtaining elsewhere in the regular service.

ice he knew very well. In visiting classmates already on duty with their batteries among the New York and New England forts, as well as during his brief stay at the barracks, he had noted the scrupulous deference of the veteran sergeants when addressing their officers. He could understand awkwardness and clumsiness among the recruits, but the idea of a corporal chafing him on the cut of his clothes and—the idea of a two months' recruit being a corporal, anyhow! Never in the tales told of the Fire Zouaves of '61 had he heard of anything much more free-and-easy than the manners of this camp of regulars. Never in his wildest dream had he figured such a specimen of the commissioned officer as he found in Capt. Glose. In the contemplation of this character the go-as-you-please style of the enlisted men sank into insignificance. Long years afterwards Lambert used to go over this meeting in his mind, and for two years, after importuned, he would convulse his brother officers by vivid description of it. But there came a time when they no longer laughed and he no longer told the story save to those he loved and trusted utterly.

Aroused by some unusual chatter among the men, the first sergeant of company G, smoking a pipe while working over a ration-return, stuck his head out of his tent and saw a young gentleman in a light-colored suit, courteously raising a drab derby in his kid-gloved hand, while he stood erect with soldierly ease before the company commander. Sergt. Burns also noted that some of the men were tittering and all of them looking on. One glance was enough. The sergeant dropped pen and pipe and came out of his den with a single bound, buttoning his blouse and glaring about him as he did so. "Hush your d-d gab, you!" he fiercely growled at the nearest group. "Get into your coats, there!" he swore at another, while with menacing hand he motioned to others still, whose costume was even more primitive, to scramble back to their tents. In ten seconds silence reigned throughout the camp almost as complete as that which was maintained, for that time, at the tent of the commanding officer. Lambert actually did not know what to say in response to his superior's announcement. It was full ten seconds, or more, before he determined in what form to couch his next remark. He had intended to say: "I have the honor to report for duty, sir," but a vague suspicion possessed him that this might be some game at his expense—some prank such as old cadets played upon "plebes." He compromised, therefore, by his preconcerted of a strictly soldierly report and his sense of what might be due his own dignity. "My name is Lambert," said he. "And I am here for duty as second lieutenant."

Slowly the man in the camp-chair laid down his work, sticking the needle into the flap of the tent and hanging the thread upon it. Then he heaved up out of the chair, hung the damaged trousers over his back and came ponderously forward. Not a vestige of a smile lightened his face. He looked the young gentleman earnestly in the eye and slowly extended his big, brown, hairy hand. Seeing that it was meant for him, Lambert shifted his hat into the left, leaning his sword against the tent-pole, and his dainty kid—a wild extravagance so soon after the war—was for an instant clasped, then slowly released. Capt. Glose unquestionably had a powerful "grip."

"How'd you come?" he asked. "Kind of expected you Monday evening—out from Quitman."

"The general kept me over a day or two to let me see New Orleans. He told me that you would be notified, sir. I hope you got the letter?"

"Oh, yes. That was all right. There was no hurry. I didn't know as they could get passes over the Northern. I suppose the chief quartermaster fixed it for you, though?" And the brown eyes searched questioningly the young officer's face.

"Passes? No, sir; I bought my ticket through—"

"No! Why, you needn't have done that. The Quitman road's biddin' for all the government freight it can get now. They'd have given you a pass in a minute. I suppose you want to be quartermaster and commissary?" And again the brown eyes looked almost wistfully into the blue.

"I? No, indeed, sir. I don't know anything but a little tactics. What I most want—with a glance around and an apologetic laugh—"is a chance to wash off the cinders—and something to eat. I'm hungry as a wolf."

The captain looked troubled. "I've had my grub; so've the men, 'cept those that come back late in the night—been up to Buckatubbee with the marshal. Did you try over at Toog'loo?"

"Everybody was asleep over there. I left my trunk at the railway station and walked out."

"Why, I told the sergeant to send a mule in last night on the chance of your coming by the Owl. Didn't anybody meet you?"

"There was a mule, but no body," laughed Lambert, "except a ducky asleep in a freight car. The mule was lying in the dirt, and snapped his head-stall when I tried to raise him."

"What became of him? He didn't get away, did he?" asked Glose, in great anxiety.

"He didn't try to," answered Lambert, in some amusement. "Like the eminent head of the late unpleasantness, all he asked was to be let alone. I left him browsing in the public square."

"And the bridle and saddle, too? Great Peter! That's bad. Some lousy nigger's got him by this time, or his trap-pins at least, an' he'll swear the Freedman's Bureau gave him the hull outfit, and it'll be stopped against my pay. Sergeant!" he called; "wish you'd go right down town an' catch up that mule an'—"

"I can't go, sir," promptly answered Sergt. Burns, his hand going up in un-

accustomed salute in deference to the presence of the new officer. "I'm busy with them ration returns. Here, Finney, you go."

"Go where?" said a young soldier squatting at his tent door and greasing a pair of shoes with a bit of bacon-rind. He hardly deigned to look up.

"The captain wants you to go and get that saddle mule he sent up last night. Jake must have gone asleep and forgot him."

"Would it be possible to send a wagon for my trunk?" interposed Lambert at this juncture, appealing to his superior. Glose hesitated and made no immediate reply. It was the sergeant who took the responsibility:

"I'll tend to it, if you please, sir. The wagon's going up in ten minutes to haul some grain. Be lively now, Finney. Drop them shoes and start." And Finney, conscious, possibly, of some change in the military atmosphere, gathered himself together and vanished.

Meantime, in his anxiety about the government property thus placed in jeopardy, the captain seemed lost to all thought of the newcomer's comfort. It was Sergt. Burns who came forward with a camp stool and proffer of further hospitality.

"If the lieutenant can put up with such rations, I'll send something from the cook-fire, sir," said he, doubtfully, looking at his commander very much as though he thought it high time for that official to suggest something better. Lambert said he should be most grateful if that could be done—and if there were no objections; and he, too, looked expectantly at the senior officer.

"I guess that's about the best we can do," said Glose, slowly. "Tain't what you've been accustomed to, but it's what I always eat. Send us up something, sergeant—enough for two; I'll take another snack with the lieutenant."

And in less than five minutes Lambert and his new comrade were seated by a little fire on which a tin coffee-pot was hissing, and with a broad pine shelf upon their knees, from big tin mugs and broad tin plates, were discussing a smoking repast of pork and beans, to the accompaniment of bread and sirup and creamless coffee. "It's the way I always prefer to live when I'm in the field," said Glose, "and it only costs you nine dollars a month."

Lambert was too hungry not to relish even such a breakfast. He fancied he heard something that sounded greatly like a suppressed chuckle on the part of the soldier cook at his senior's remark upon the cost of living in the field, but sensations and experiences were crowding thickly upon him and there was little time for trifles.

Through the good offices of Sergt. Burns, a wall tent was pitched that

Were seated by a little fire.

morning for "the new lieutenant" to the left of the domicile of the company commander; a wooden bunk was hooked up in an "A" tent in the back, and Lambert began unpacking his trunk and setting up housekeeping.

"I suppose I can get what furniture I want in town," said he to Glose.

"Depends on what you want," replied the senior, warily, "and whether you care to throw away your money. What'd you want to get? They will skin the last cent out of you there at Cohen's."

"I merely wanted some cheap trunk for camp, and some washstand fixings," Lambert answered, falling into the vernacular of his comrade with the ease of one just out of the national school, where every known American dialect can be heard—"things I can throw away when we leave."

Glose was silent a moment. "I can let you have everything you need, if you ain't particular 'bout their bein' new. They're just as good as anything you can buy, and won't cost you near so much." Then, after a little hesitation:

"They ain't mine to give, or I'd let you have them for nothing."

Lambert had precious little money left, even after drawing his November pay in New Orleans; but he had a big mileage account to collect, for in those days nothing was paid to the young graduate in advance, even though he had to find his way by the isthmus to the mouth of the Columbia. He thanked his comrade, and by evening was put in possession of an odd lot of camp furniture, some items of which were in good repair and others valuable only as relics of the war. A camp mattress and some chairs bore the name of Tighe, and the soldier who carried them in remarked to his chum: "They didn't burn 'em after all, did they?" From which Lambert drew inference that the property in question had formerly belonged to an officer of that name who succumbed to the epidemic of the previous year.

But the principal question remaining unsolved was that of subsistence. Waring and Pierce had told him that in all probability he would find that Glose was living on soldier fare and had no "mess arrangements" whatever. This, as we have seen, proved to be the case—and Lambert inquired if there were no possibility of finding board. "Yes," said Glose; "Mr. Parmelee, the deputy marshal, lives up the road about half a mile, and he told me to say he'd be glad to accommodate you." Lambert lunched in camp at noon, and about

three o'clock came forth from his tent buttoned to the throat in his handsomely fitting uniform, his forage-cap cocked jauntily over his right eye, and a pair of white gloves in his hand. A soldier slouching across the open space in front shifted to the opposite hand the bucket he was carrying and saluted. Glose surveyed his trim subaltern without changing a muscle of his face.

"What do they charge you extra for them buttons?" he finally inquired. Lambert said he didn't know. They were on the coat when it came from the tailor's. Would the captain kindly direct him to Mr. Parmelee's and permit him to go thither? The captain gravely said he need not ask permission just to leave camp—even the men didn't do that—and gave him the needed instructions, winding up by saying: "Got your pistol?" Lambert answered that he never carried one.

"You'll have to, here," said Glose, "or be out of fashion entirely. I ain't got one to lend, but if you've a mind to pay less than cost I've got one that will just suit you, strap and holster complete." In five minutes the trade was made, and Lambert had only eleven dollars left when he started to hunt up Mr. Parmelee.

Glose watched the erect figure of the young fellow as he stepped briskly away. So did the first sergeant. Midway across the open space between the tents half a dozen of the men were squatting, in the bright sunshine, pipes in full blast, engaged in a game of cards that looked suspiciously like draw poker, a gray blanket being outspread and little piles of white field beans decorating its outer edge at different points. Surrounding the players were perhaps a dozen spectators, in various costumes more or less soldierly. At sight of Mr. Lambert in his trim frock coat some of the number faced half towards him; some, as though embarrassed, began to edge away. The gamblers calmly continued their game. If the young officer had looked as though he did not notice them, the chances are that, though he passed within ten feet of the group, no one of the party would, in proper and soldierly style, have noticed him, but Lambert had seen enough "slouching" for one day, and his youthful soul was up in arms.

[TO BE CONTINUED.]

STORY OF AN OPAL.

It Was Placed Beyond the Power of Working Mischief.

"Talking about luck stones," said the jeweler, "I was an eye witness once to a most remarkable instance of superstition in regard to the opal, and I dislike to tell the story because it sounds hardly credible."

"Tell it, tell it," urged the company; "the bigger the yarn, the better we will like it."

"It is merely an incident of travel that came under my own observation. I was returning at the time from a trip abroad, and when we were one day out I made the acquaintance of two strangers in rather a peculiar way. A gentleman approached me and said he had learned who I was and wanted me to do him a favor. Then he pointed out a man who was pacing the steamer's deck and told me to notice the opal he wore in his scarf. I had already seen it and observed that it was a very fine stone."

"Purchase it for me," said my new acquaintance, and he told me his name, which represented uncounted wealth. But I objected, as the affair seemed a little peculiar.

"Pay any price he asks—I must have it," he urged.

"May I inquire why you want it?" I asked. He hesitated, then said:

"My wife is with me on the boat. She has seen the gem and set her heart on obtaining it. She is an invalid and I try to give her everything that she desires. She is not unreasonable, although this may appear so to strangers. My check will be ready for the price of that opal."

"Well, I had become interested, and I made the acquaintance of the man who owned the opal, and after admiring the gem sufficiently and letting him know that I was in the business of buying and selling stones, I casually made him an offer. You see, I didn't want him to think I was after the opal. He was at first surprised, then seemed to consider the matter, and finally named the only price which would induce him to part with it. I really think he asked twice its value to prevent me from taking it. But I accepted his figures on the spot and, possessed of the opal, sought the millionaire, who insisted on adding a handsome commission to the original price."

"Well," queried the crowd as he ceased speaking.

"The climax came an hour later when the new owner of the opal called me to the bow of the steamer and asked me to witness the burial of the gem in five fathoms of green water."

"Threw it overboard?"

"Exactly. He said his wife would not have known a moment of peace with that unlucky gem flashed in her eyes whenever she was on deck. I wished he had commissioned me to throw it overboard, but he made sure that it could never again act as a hoodoo."—Detroit Free Press.

Pat's Password.

The Irish soldier seems to furnish the story-teller with many an anecdote. The following incident is said to have occurred at the battle of Fontenoy, when the great Saxe was the marshal in command.

"The password is 'Saxe,'" said the officer of the guard, as he sent off a Irish trooper with a message: "don't forget the word."

"Sure I won't, sir," was the reply. "Saxe—my father was a miller."

When he came to the sentinel and was challenged, the Irishman looked wise, and whispered:

"Bogs, you spalpeen! Let me through!"—Harper's Round Table.

FEMININE NECKWEAR.

Collars, Collar Bands, Frills, Tucks, and Other Things.

Fashion in collar bands and their decoration still plays an important part in the finish of our costumes, and while they are not so elaborately trimmed as they were in the winter, a frill of some sort, and above all the touch of white, is a positive necessity for the success of a fashionable gown. A short ruche, wider at the back than at the sides, appears on all the half dressy gowns, and this is made of lace or net in any of the bright colors. Deep cream or white is the most becoming, and the net is doubled and plaited in box plaits, but all these ruches are less full than they were and not so wide. A double ruche of black net and an inner one of white lace is very effective on some gowns. These little frills are shown in the shops made of chiffon net and lace all plaited into a band ready to be fast inside the collar.

Loops of ribbon are still used at the back of dressy gowns, with the lace ruche falling between, and one pretty neck finish is two quarter of a yard lengths of four-inch black satin ribbon cut with standing ends and plaited on one edge in a small double box plait, forming two little frills meeting in the back, and the lace, which begins narrowly in the sides, falls over these. The tucked collar bands are very pretty with simply the lace ruche in the edge, and the knot effect in front is another fancy this season which is very pretty on some gowns. Linen collars are still worn with shirt waists, but the stock collar of silk, with a narrow turnover collar of linen is by far the most fashionable. This sort of finish is seen on almost every bodice intended especially for morning wear. The narrow linen collar comes in great variety, plain, hemstitched, and with tiny insertion in lines of embroidery a little way from the edge, and trimmed with lace. Then there are various shapes in linen lawn with insertions and edgings of lace, and embroidered edges as well. Stocks made of the silk like the bodice tied in a soft bow with hemstitched ends in front, and a narrow linen collar turned over the edge, are in excellent taste as well as good style. Ribbon is used for stocks, with the order of last season reversed and the bow tied in front, and the same narrow linen collar is the finish, with narrow cuffs to match.—N. Y. Sun.

IN REGARD TO GIFTS.

Random Presents Not as Effective as Systematic Ones.

Loving friends and relatives are apt to give a superabundance of toys to the children in whom they are interested, and a child really becomes fretful and troublesome who has more toys than he needs. Instead of giving the children toys on each birthday, try giving both boys and girls articles in silverware and linen. Present a silver fork, table or teaspoon on each birthday, and have the date clearly engraved on each article. Continue until one dozen spoons or forks have been given, then begin with a different article.

In a family where there are three maiden aunts, a teaspoon, tablespoon and a fork are given upon each birthday to their little niece, so at the age of 12 this little maiden will be the happy possessor of one dozen of each of these articles.

The grand father presents a handsome piece of linen at the same time, and the little woman is extremely proud of her handsome possessions.

Try this plan. It is far wiser than to spend the same amount upon some toy that will be broken or thrown aside almost before the day is done.—Philadelphia Record.

Kind, Appreciative Words.

I wonder why we are so chary of kind, appreciative words! It costs so little to give encouragement and joy to our fellows. A multitude of appreciative thoughts concerning our friend may be hidden in our hearts, but how seldom do they find expression. We may laud his excellence to others, but never a word of praise reaches his ear. Many a despondent soul would be cheered and helped over a desperately hard place if only some one would whisper a heartening word. It is wonderful how a particularly gloomy outlook may be brightened by a timely appreciation of our struggles and triumphs. I do not mean flattery or fulsome praise, but genuine appreciation. Give expression to your appreciation of the virtues and achievements of your dear ones in the same circle as well as of those outside.—Detroit Free Press.

Character in Children.

Parents sometimes congratulate themselves upon the fact that one child is never self-willed, never passionate or angry, always amiable, contented and calm, seeming to need no discipline and no restraint. And they mourn over the fact that another child is eager, impetuous, willful, troublesome. Yet not infrequently the mourning and the rejoicing ought to change places, if the future life and character be taken into account. The tranquility of the one may be only the outcome of a feeble character, which leans against the nearest prop because it cannot stand alone, while the other, who is so difficult to manage, may contain the elements of a powerful nature, which needs only to be guided aright to become a valuable and a noble man.—N. Y. Ledger.

Fat for Larding.

In larding with pork the fattest piece procurable should be bought (lean salt pork is not available for any use), and the strips always cut from that part between the streak of lean and the rind. This is the only portion firm enough for the purpose. The bits should then be laid in ice water to become crisp before using.—N. Y. Post.

Economy.

Mistress—I'd much rather raise your wages, Bridget, than have you leave us. Bridget—Well, mum, Oi was thinkin' of marryin'—but wid your good offer, I can save up better for the next proposal.—N. Y. Truth.

HUMOROUS.

—A Woman's Question.—"Tillie Brown had a dreadful bad fall from her wheel Monday." "Was she dressed for it?"—Chicago Plain Dealer.

—Feminine Evasion.—"Julia, you said you weren't going to wear any more dead birds on your hats." "I know; but this redbird died a natural death."—Chicago Record.

—Resident.—"Think of commencing business, eh? Seems to me you are rather young for a family physician." Young Doctor.—"Yes, but—er—I shall only doctor children at first."—Tit-Bits.

—She.—"They say that the ones who really appreciate the actors are those in the top gallery." He.—"I shouldn't wonder. You see, they are high enough to see over the hats."—Yonkers Statesman.

—"You remember Borrow's?" "Do I?" "Well, he came in to-day, and paid me ten dollars he owed me, and I hardly knew him." "Well, I don't wonder. That's not at all like him."—Yonkers Statesman.

—Appropriate.—"You don't bring the chickens out prominently in your picture of farm life," said Rooster. "Um! No," replied the artist; "I've just made them lay figures."—Philadelphia North American.

—Secondhand.—Mrs. Bricabrac—"Oh mercy, Bridget, how could you have broken that precious vase! It was 400 years old." Bridget (calmly)—"Oh, it it was an old thing like that, yez can take it out av me next week's wages."—Truth.

HABITS AND HEALTH.

People's Instincts Are Usually a Good Guide.

Almost all men have certain "ways" of living which they have found conducive either to health or work, and a very large section of them suffer greatly from a torrent of criticism for those ways. There are men who never need exercise, or, as Mr. Chamberlain says in his case, do much better without it and if they escape the minatory lecture once a week they are greatly favored by fortune. There are other men, quite numerous, who benefit by exercise in big draughts but not in homeopathic doses, who exert themselves furiously once a week, or during an annual holiday, but for the rest of their time benefit most by bodily torpor. They are not scolded, for, as a rule, they are considered too far gone for that operation to be beneficial, but they are habitually and very openly disbelieved. They are talking nonsense, it is held, on a matter they know nothing about.

There are thousands of Englishmen who are never at peace if they are not warm, and are told by all sincere friends that they are killing themselves with "coddling," and tens of thousands who can neither think nor work unless they are cool, and who are pestered by everyone who knows them about wraps. We used to lecture one old gentleman ourselves because he would ride on omnibuses, wanting, he said, "full air," and the lectures did not stop when at 84 he was more hale than the lecturer at 45. Modern biographers are particularly impervious to reason on this point. They note at once the smallest departure from the usual in the habits of daily life, as if it were an aberration, never thinking that their victim probably knows himself a great deal better than they can know him, or is obeying an instinct as deeply planted and as beneficial as that which induces a dog occasionally to eat grass. There are men, Scotchmen and Scandinavians, no doubt, mostly, who simply must "get into the cold" for a few weeks every year, who thirst for it like a Swiss for mountains; and there are thousands of women who would live to 100 if only they could have a month of a year in a place where they were warm all through. To condemn such instincts as self-indulgence, unless they conflict with clear duties, is foolish.—London Spectator.

Treachery on Cape Cod.

Nobody knows how many vessels have been wrecked on Cape Cod since the bleak December day when the Mayflower rounded Race Point and sought shelter in what is now the harbor of Provincetown. The number is very great, however, and the loss of life on this most dangerous part of the whole New England coast has been something appalling. A list, admitted to be incomplete, of the wrecks since 1873 shows that 151 vessels, including three steamers, have gone to pieces on the pitiless sands of the cape and had not the waves always hastened to remove the evidences of their work the shore all the way from Chatham, at the elbow of Massachusetts' arm, to the crook of her bent hand would be piled high with the ribs and planking of shattered vessels. A large proportion of the cape's victims are coasting schooners, with only an occasional bark or brig. These disasters, therefore, rarely attract much attention, but they are tragical none the less, and almost every storm adds to the number of dreadful stories which the lighthouse-keepers and members of the life-saving service have to tell.—N. Y. Times.

Equally Unlucky.

Sympathetic Lady—So your husband was killed? Mrs. Rooney—Sure, an' he was, mum, and it was from the 13th floor he fell. "An unlucky number for him." "It was that; but I'm thinking it would have been just as unlucky for him, poor man, if he had fell from the 26th."—N. Y. Tribune.

A Stern Race.

Gertrude—Indeed! And is he very successful? "No. It is still a long way ahead of him."—Cleveland Leader.

His Heaviest Age.

"At what age does a man really begin to feel the weight of years?" "Usually on his 21st birthday; and it takes the sensation at least four or five years to wear off."—Cincinnati Enquirer.

Exciting Times At Frankfort.

A most exciting scene was enacted yesterday in the Senate. Brounston and Goebel objected to Lieutenant-Governor Worthington's rulings, and demanded that he vacate the chair. Worthington retorted: "By God I have a constitutional right to preside and I am going to do it!" Goebel then took a chair, as presiding officer, and recognized Brounston, and Kentucky had the distinction of two Senates in session in the same hall. The session was soon adjourned, and in the afternoon a truce was patched up, Goebel presiding pending Worthington's decision.

Relief For Americans In Cuba.

YESTERDAY President McKinley sent a message to Congress urging an appropriation of \$50,000 for the relief of suffering Americans in Cuba, and to transport those who desired to come, to America. Congress immediately passed a resolution unanimously, making the appropriation.

Tollgate Troubles.

OVER in Madison the Fiscal Court has bought three roads and appropriated \$3,000 to build another.

In Bath an election has been ordered for next November to vote on a bond issue to buy the roads, and in the meantime the raiders are breaking down gates every night or two.

Three more toll-gates were destroyed by raiders in Mercer county Thursday night. At one place a toll-house was burned and in another instance a toll collector was forced to cut down his own gate.

Two gates were torn down Friday night in Bath county—one near Sharpshurg, the other near Bethel.

Thirty-six tobacco beds near Sherburne and four near Wedonia, in Mason, were destroyed the other night. A note on each bed warned owners not to raise over fifteen acres of tobacco this year. Farmers will do picket duty over their tobacco beds at night.

Notes tacked on thirty tobacco barns warn Clark county farmers that their barns will be dynamited if they raise over six acres of tobacco.

Choosing A Profession.

[Walter Champ in Judge.]

DARKTOWN colored society was agog over a farewell reception to be given by Mayor Sam Johnson in honor of his son George, who was to start in the morning to college. The father was trying to decide on a profession for his son to adopt when the arrival of the guests interrupted his meditations.

"Good-evenin', Mistah Johnson," said an early guest.

"How d'ye do, Uncle Abe?" inquired the host.

"Oh, I's jes' toler'ble, thank yo'."

"De compliments ob de ebenin', yo' bonah," chimed uncle Enoch Jackson.

"Glad toe see yo', Uncle Enoch. How yo' be?"

"Jes' toler'ble, yo', honor. I's got a powerful misery in mah back."

"Pleased toe greet yo', Uncle 'Rastus. How's all?"

"Oh, I's toler'ble peart, Mistah Mayah, but de ole woman is mighty pohly. B'liebe mah soul she's bin hoodooed. Mah little Gawge is ailin' wid a misery in his side, an' Mirandy is defined toe her room wid rheumatiks. We's jes' toler'ble, thank yo'."

"Powerful glad toe see yo', Uncle Eph. How am yo'? Yo' look fine as a fiddle."

"Lawd's sake, Mistah Johnson! I ain't seed a well day since Susan had de mumps an' Matilda like toe died wid de pneumony an' de ole woman an' me had de yaller janders. No, sah; I ain't bin well ernuff toe go 'possum-huntin' but foah nights dis week."

"Mah son, how does yo' feel by now?" asked the host.

"Jes' toler'ble, father."

"Dat settles it, mah son. I's gwyne toe make a doctah out ob yo' ef it takes four years. Den yo' kin cum back toe Darktown an' be desabor ob yo'r sufferin' race. Yo'll make a fortune an' den we'll retiah toe a watermillon plantashun."

Will Not Perform Miracles But It Will Cure.

DR. MILES' RESTORATIVE NERVINE

cures nervous prostration. Not miraculously, but scientifically, by first removing the germs of disease, and then supplying healthy nerve food, increasing the appetite, helping digestion and strengthening the entire system. Desperate cases require prolonged treatment as shown by that of Mrs. M. B. Reed, of Delta, Iowa, who writes: "As the result of a lightning stroke, the physicians said I had a light stroke of paralysis, my limbs would all draw up. I would have throbbings in my chest that seemed unendurable. For three months I could not sleep and for three weeks did not close my eyes. I prayed for sleep, and felt that if relief did not come I would be dead or insane. I took Dr. Miles' Restorative Nervine and the second night slept two hours and from that time on my health improved; slowly at first, but steadily and surely. I took in all 40 bottles, and I cannot express how grateful I am, for I am now perfectly well, and have taken no medicine for over four months." Dr. Miles' Nervine is sold by druggists on guarantee, that first bottle benefits or money refunded.

News Of The Courts.

IN Squire Lileston's court Saturday Rube Henderson, colored, charged with raping Mattie Thompson, colored, at Clintonville, was held over in \$200 bond for trial by Circuit Court.

Wm. Shannon, of color, was put under \$200 bond to keep the peace. He was tried for threatening bodily harm to his wife.

J. T. HINTON has an immense stock of carpets. His prices on ingrain carpets are extremely low, and he is selling carpets every day. This is your chance.

The Fayette Court-House Burns.

THE Fayette county court-house at Lexington was damaged by fire Friday morning at ten o'clock to the extent of about \$55,000. Most of the records were saved, but many historic and valuable portraits were burned, and Joel T. Hart's famous statue, the "Triumph of Chastity," was broken into atoms by the large bell, which fell from the dome of the building. Portions of the broken statue were carried away by relic hunters. It is believed the insurance (\$55,000) will restore the court-house.

The Hart Memorial Association has already taken steps to replace the statue. It is believed that the model is still in Italy, and if it can be used, another statue will be made from it.

High School Representatives.

THE preliminary declamatory contest held at the City School chapel Friday night to select a boy and a girl declaimer to represent Paris in the Bluegrass Tournament on the 27th at Harrodsburg, was attended by a large audience. Chas. Blessing and Miss Nita Hudson were selected to contest for the prizes at Harrodsburg. Miss Minnie Veech Martin was chosen to enter the vocal contest. Miss Sallie Joe Hedges will be the pianist.

Willis McMurtry and Claudia Wilhoite, declaimers, Lily May Maseley, vocalist, Ida Waide, violinist, and Stella and Ida Waide, pianists, will represent Nicholasville.

Nominees in Nicholas.

A DISPATCH from Carlisle to the Louisville Post says: "At the Democratic primary held in this county Saturday there were forty-two entries and several close finishes. The nominee for Sheriff winning by ten and the School Superintendent by nine. The winners were: Judge, John W. Tilton; Attorney, John F. Morgan; School Superintendent, Jas. Brady; Sheriff, Chas. T. Donnell; Deputy, Willis Mathers; County Clerk, John A. Campbell; Circuit Clerk, Sol Robertson; Jailor, M. T. Rafferty; Assessor, Newton Rankin; Coroner, John R. Connelly."

Murderers Sing and Pray.

HENRY WHITNEY, colored, charged with murdering his brother, Jim Whitney, in this county last Wednesday, was brought before Squire Lileston-acting judge during Judge Howard's absence—for trial. Whitney was held over without bail for trial by the Circuit Court. Whitney passes his time in jail in singing and praying, as does also Ben Bradley, under indictment for killing his wife at Millersburg with a poisoned apple.

A Delightful Entertainment.

THE "Rose Bud Club" of Miss Bettie Ingels' school gave a delightful entertainment last Thursday evening in the Odd Fellows' Hall to a large and well pleased audience. The President of the Club, little Miss Katie Lee Hooge, presided with ease and dignity that could not be excelled by many who are her elders. The programme consisted of marches, recitations, dialogues, and exercise songs, and each participant deserves special mention, but space forbids. Every one performed the part allotted to him or her in a manner that showed careful and thorough training on the part of the teacher, and perseverance and progress on the part of the pupil. The crowning of the May Queen, Miss Arabella Redmon, followed by the dance around the May Pole was very pretty. The Queen's pages were Masters Joe Mitchell and Archie Paxton who were very gallant, and were dressed in picturesque costumes. The youngest tots in the school, Misses Louise Davis, Essie Saloshin and Burdie Holstein, literally brought down the house in their recitations and songs. The programme was pleasantly interspersed with music by the Paris Orchestral Band.

A MAIN STREET lot 48x107, with a six-room residence, adjoining Christian Church, will be sold on reasonable terms at public sale, May 19th, by Chris Grosche. See ad in another column.

A BOTTLE of Dr. Bell's Pine Tarr Honey should be on the medicine shelf of every home. In a sudden attack of croup it is invaluable; allaying the irritation and ending the danger in less time than it would take to go for the doctor. It stands pre-eminent as a remedy for coughs colds and all kindred diseases.

THE carpet display at J. T. Hinton's equals any in Kentucky. The low prices will interest any buyer. Look them over.

CHRIS GROSCHKE will offer at public sale, May 19th, a centrally located cottage. See ad in another column.

Hop Lee Selling Out At Low Prices.

ON account of dull business I intend to leave Paris in two weeks. I am now selling my entire stock of goods at retail at low prices—for less than I paid for them. Please call and buy something and help me raise some money. I have been in Paris nearly six years and many people have been very kind to me and I am sorry to leave; but I can't make a living here and I am compelled to move away. Come and buy something from me, I would do as much for you if I could. Your Friend,
Hop Lee.

THE BOURBON NEWS.

(Seventeenth Year—Established 1881.)

Published Every Tuesday and Friday by
WALTER CHAMBERLAIN, Editor and Owner
BRUCE MILLER, Editor and Owner

"UNTIL THE DAYBREAK."

A human soul went forth into the night,
Shutting behind it Death's mysterious
door,
And shaking off with strange, restless
might
The dust that once it wore.
So swift its flight, so suddenly it sped—
As when by skillful hand a bow is bent
The arrow flies—those watching round the
bed
Marked not the way it went.

Heavy with Grief, their aching, tear-dimmed
eyes
Saw but the shadow fall, and knew not
when,
Or in what fair or unfamiliar guise,
It left the world of men.
It broke from sickness, that with iron
bands
Had bound it fast for many a grievous
day.
And love itself with its restraining hands
Might not its course delay.

Space could not hold it back with fettering
bars,
Time lost its power, and ceased at last
to be;
It swept beyond the boundary of the stars,
And touched Eternity.
Out from the house of mourning faintly
lit,
It passed upon its journey all alone:
So far not even thought could follow it
Into those realms unknown.

Through the clear silence of the moonless
dark,
Leaving no footprints of the road it
trod,
Straight as an arrow cleaving to its mark,
The soul went home to God.
"Alas!" they cried, "he never saw the
morn."
But fell asleep outwearied with the
strife.
Nay, rather, he arose and met the dawn
Of everlasting life.
—Christian Burke, in Pall Mall Gazette.

REWARD OF VIRTUE.

BY GWENDOLEN OVERTON.

WITH all possible
good intentions
and sincerity,
a man cannot reform
among his own
people. He is not
taken seriously.
His abstentions
from deeds of vice
are imputed to
interested motives.

Mankind at the club
assembles and meets together to jeer
at him; his brother laughs him to
scorn; the women mistrust him. Only
many years can set him right with
them—and a man does not like to wait.
When he reforms, he wants to do it at
once. He has no fancy of wearing the
stained garb of sin until the sun of vir-
tue shall bleach it white. He would
don immediately the snowy robe and
be made welcome among the elect.
Which may not be. If you mean to re-
form, you must go away.

Lovat grew sick of the life he had
led for ten years—ever since he had been
a pretty boy of 18, who should have been
learning useful things. It had not been
such a very bad life, but it certainly had
not been a good one. He tried to do
right at home, and failed. Then he
came to the states.

Now the states—if you except, per-
haps, New York—is a place where there
are neither towns nor temptations. Over
all its broad prairies, where sleek steers
browse and gentle couriers stray, there
hangs an atmosphere of soft pastoral
virtue. There is also in the human heart
a true, natural goodness learned from
the unspoiled savage. There is no lit-
tle-tattle, and a man is what he is, not
what he has been. They know this in
England, just as we in the states know
that there is one fair-sized town in
Australia, and that all the rest is
"bush."

Lovat knew it, and he also knew that
it was most true of Montana. That he
was aware of the existence of Montana
shows that his youth was not alto-
gether wasted. His family had some
land there. Of this family it must be
said that nothing in England is better
or older. Lovat is a name of such lus-
ter that no bearer of it, whatever his
misbehaviors, could tarnish it. It is
also a rich family—very rich. Wilton
Lovat was the younger son, but he had
a decent fortune of his own. Therefore
he could do pretty much as he pleased,
and when he quarreled with his father
and his allowance was stopped, he didn't
care. His father argued with him per-
suasively: "Why, if you want to re-
form, can't you stay here and do it?"
"Because a chap can't in his own
town."

"He can, if he's any character."
"No, he can't."
"I say he can. What do you suppose I
did?" His voice subsided as he con-
templated himself in the pleasant light
of an example.

"You didn't reform. You only mar-
ried."

Which happened to be so true that
Lovat, Sr., was unable to reply, save in
the not uncommon parental fashion of
answering the unanswerable, known to
childhood as "getting even." He cut off
the allowance, but graciously permitted
his ungrateful son to dwell upon the
Montana lands.

Wilton went at breeding racers, as is
the custom of Montana. He had a log
house on the ranch, and it was fur-
nished with rough chairs and tables and
benches, and with many sorts of string
instruments, and with pictures of his
family, and of some girls who had liked
him, and of professional beauties who
were not nearly so beautiful as his own
sisters. For his family was handsome
as well as of great repute and rich.
There were also royal groups from the
Graphic and Illustrated News on his
walls, and there were books in five dif-
ferent languages.

The change was not unpleasant. He
looked after his stock, and played the
musical instruments, and read the
books in five languages for a twelve-
month. He decided that he was re-
formed then, and began to grow tired
of being a patriarch over his own herds.

Patriarchs, as he understood it, had
wives and children. He had only horses,
and they didn't take the place of so-
ciety. He was fond of society. So he
made the acquaintance of some of the
officers at Keogh. They gave him stag
dinners in Miles City and they enter-
tained him at the post club, but they
did not invite him to their houses. He
did not meet their daughters nor their
wives. An Englishman has to grow
wise before he learns that this is a small
world and that the tight little isle is
not too tight for rumors to escape from
it—that the rumors, moreover, are fre-
quently exaggerated. Lovat began to
grow wise. At first he wondered, then
he understood. He asked himself what,
after all, is the reward of virtue; and he
determined that it has none. There are
those who hold otherwise, but the ques-
tion is not yet settled. He was lonely,
expatriated and homesick. He was also
young and full of energy and anxious to
be met half way. But he could not
travel the whole road alone. He turned
and went back to where he had started
from. There, at least, there was femi-
nine companionship. His vice was less
glided than of yore, but that was the
fault of the country.

He threw over once and for all every
hope of admission to the society of his
equals in the garrison. The service is
critical and jealous of its women. But
he was still entertained by the men.

When it was too late to mend—for,
copybooks to the contrary, notwith-
standing, it frequently is—he came to
repent more heartily than ever before,
aye, bitterly. He met and fell in love
with Constance Chamberlain, as many
another man has done and still does,
though she is Mrs. Brookfield now. She
was even prettier than to-day, for she
was very young, just 18.

Lovat knew her by sight, but he had
never spoken to her or heard her speak
—which was a harmonious treat—until
he came upon her, one day, some five
miles from the post. She had dismount-
ed to tighten her saddle girths, and she
was alone. How should Lovat have
guessed that she had seen him coming
ere she had slipped to the ground, and
that she was purposely goading her
placid black steed to be unmanageable?
He came to her aid with an "Allow me
to be of service," which she answered
with a "You are very good, thank you."
"You should not be away off here
alone, Miss Chamberlain," he said.
"I know it."
"It is not safe."
"I am so tired of being safe." Her
voice was sweet, low and unemotional.
There was no suggestion in it of unfe-
minine rebellion. And Lovat, who had
not heard the voice of a gentleman for
many, many months, was pleased—
well pleased.

"I only trust you may never learn to
know, as most women do, what it means
to be tired of not having been safe."
Then he mounted her and put the
reins in her long slender hands. He had
reformed, you must go away.

Lovat grew sick of the life he had
led for ten years—ever since he had been
a pretty boy of 18, who should have been
learning useful things. It had not been
such a very bad life, but it certainly had

self and any good woman he might
really love a wall that in all his days
could never be razed. He decided finally
that the only course that would be
fair to her and easiest for all would be
an open one.

They sat together on the shady side
of a low hill, late one day.

"Constance," he said, "I'm going to
ask your father to let you marry me,
if you are willing to."

The bright color faded from her
cheeks.

"Don't say you aren't willing," he
cried.

She still said nothing whatever.

"Are you, Constance?"

"Yes."

"Then why did you get so pale?"

"I don't know. Did I?"

She cried a little and said she was
very happy and that she would marry
him, even if her father would not con-
sent. "But don't ask him till after
the races, will you?"

"Two weeks!—a whole fortnight!"

Why?

"Because."

"Very well."

He didn't see her again before the
races. She sent him a note saying that
she did not dare to meet him, that her
father had forbidden the long rides
alone. She would wear his colors at
the track. For Lovat was to ride. So
were several of the officers. It was a
gentleman's race. The cup was given
by the garrison women.

Lovat won it. He and the officers
went into Miles City to rejoice. Some
were in a buckboard, some, with their
wives, in the ambulances, most were
on horseback. He rode with these lat-
ter and watched Miss Chamberlain, who
was ahead on the road, riding with Lieut.
Garret. She had not worn his colors;
though, to be sure, she had worn none
at all. Lovat had kept studiously away
from the post women all day, but just
once he had passed close to Constance.

"Will you meet me to-morrow at the
old place, dear?" he said, quietly.

She did not raise her eyes or seem to
notice him; but she answered: "Yes,
Wilton, at four."

It happened that Lovat was riding
beside Capt. Chamberlain.

"Capt. Chamberlain," he said, "as I
have won the ladies' cup, do you think
they would consent to baptize it for
me?"

"Why, yes. I should think so."

"Then will you have the ambulances
and Miss Chamberlain stop in front of
Stewart's, and I will send it out to
them?"

So the ambulances stopped at Stew-
art's and the officers got out, but the
women stayed in, and Miss Chamber-
lain and Garret waited, too. Garret was
a temperance man and very good. Lovat
filled the cup with champagne and sent
it out with his compliments and thanks.
He felt just a bit bitter as he did so. He
watched Constance from an open win-
dow. She did not see him, and when the
cup came to her she rejected it with
disdain. She was playing to Garret
now. Lovat heard her say: "I don't
drink wine, Mr. Garret, more especially
when it comes from a man like Mr.
Lovat."

"Perhaps it's only a bluff," the Eng-
lishman tried to tell himself. He hoped
so until the next day at four, when
Constance and Garret entered by him
as he waited at the trying place, and
Garret raised his cap to him, but she
ignored him and laughed her low, pret-
ty laugh, as she said to the lieutenant:
"What a serious British face he wears!"

Before long even the men dropped
Lovat. Still, they were sorry when he
shot himself in the lonely ranch house
one night. But Miss Chamberlain was
secretly rather proud.—San Francisco

MORBID SENSITIVENESS.

The Terrible Self-Torture of a Fa-
mous Writer.

William Hazlitt, the critic and essay-
ist, wrote with a satirical pen. But,
like most satirists, he was very sensi-
tive, and bitterly resented any attack
upon himself. So irritably alive was he
to slights that if a friend passing him
in the street without seeing him, he would
at once decide that he had been inten-
tionally "cut," fly into an absurd pas-
sion, and if possible, pillory the offender
in an essay.

Blackwood's Magazine persistently
attacked Hazlitt, who was a liberal in
politics, and therefore opposed to the
literary representative of Scotch tory-
ism. The attacks were low and per-
sonal, and so depressed the morbidly
sensitive critic that he skulked through
the streets of London like a criminal,
anxious to avoid the detective's eye.
His friend, Mr. P. G. Parmore, thus de-
scribes the painful feelings of the man
after an article from Blackwood had ag-
gravated his naturally irritable self-
consciousness:

"If he entered a coffee-house to get
his dinner, it was impossible, he
thought, that the waiters could be doing
anything else all the time he was there
but pointing him out to guests as 'that
gentleman who was so abused last
month in Blackwood's Magazine.' If
he knocked at the door of a friend, the
look and reply of the servant, whatever
they might be, made it evident that he
had been reading Blackwood's Maga-
zine before the family were up in the
morning."

"Then at home at his lodgings, if the
servant who waited upon him did not
answer his bell the first time—ah! 'twas
clear—she had read Blackwood's, or
heard talk of it! Did the landlady send
up his bill a day earlier than usual, or
ask for payment of it less civilly than
was her custom—how could he wonder
at it? It was Blackwood's doing."

Hazlitt's case is another illustration
of the inconsistency of human nature.
He could attack, but whined when at-
tacked; he expressed strongly his own
dislikes and prejudices, but resented it
when another said that he did not like
William Hazlitt. If he had had a sense
of humor, he would have been less sen-
sitive.—Youth's Companion.

THE FUR SEAL.

Some Interesting Information About
the Amphibian.

The male fur seal, or "beachmas-
ter," reaches full maturity at the age
of seven years. At that time his weight
is about 400 to 500 pounds, being con-
siderably heavier when first in from
the sea in the spring, or after feeding
in the fall, than in the intervening
period, when he fasts on land and
grows gradually lean and weak. The
males vary considerably in color; the
general shade being black or dark
brown, with longer hair or bristles
of yellowish white. These are espe-
cially long and numerous on the thick-
ened back of the neck, forming the so-
called "wig." The wigged males have
a rough, coarse coat, and their skins
are without market value. The animal
makes its home on the rocky shores
of the islands, in large, closely massed
bands, forming what are called "rook-
eries." It is extremely gregarious; in-
dividuals seldom venturing far from
the main body while on land, though
wandering about singly in the sea. The
female fur seal is much smaller than
the male, and has soft, smooth hair of
varying shades of brown, under which
is the dense, short, brown fur. The
female bears her first offspring at the
age of three years, but her full growth
is not attained till two or three years
later. The average weight of the
young female is about 80 pounds. The
growth of the fur seal, called a "pup,"
is born soon after the arrival of the fe-
male. Its weight at birth is about ten
pounds. The fur seal is polygamous,
each male capable of holding a place
on the breeding grounds having from
one to one hundred females in his
charge, constituting what is known as
a "harem." The average number being
about 30. But the size of each family
is subject to variation, depending not
chiefly on the strength of the male
but on the preference of the female for
a location, and on the topography of
the ground. The young male is very
similar to the female in color and ap-
pearance. He is not permitted to enter
the rookeries in the breeding season.
The old males are very particular in
this regard, and the "bachelors," as
they are called, are forced to herd by
themselves on what are known as the
"hauling grounds," located near the
breeding grounds, but distinct from
them.—Forum.

THE LAWS OF NATURE.

They Are Unbending and Must Be
Obed.

Nature has no pardon for ignorance
or illusions. She is no respecter of
persons. Her laws and her penalties
consider only what is, and have no deal-
ings with semblances. By this experi-
ence we come to know what reality is
that there is an external world to the
demands of which our senses, our rea-
son, our powers of action are all con-
cessions. The safety of each chain of
life is proportioned to the adaptation
of its links to these conditions. This
adaptation is in its essence obedience.
The obedience of any creature is con-
ditioned on its response in action to
sensations or knowledge. Sense, per-
ception and intellect alike stand as ad-
visers to its power of choice. The
power of choice involves the need to
choose right. For wrong choice leads
to death. Death ends the chain of
which the creature is a link, and the
life of the world is continued by those
whose choice has not been fatal. That
"the sins of the fathers are visited
on the children" is, in the long run,
the expression of Infinite Mercy. "The
goodness and severity of God." Se-
verity of condition and stress of com-
petition are met in life by the sur-
vival of those adequate to meet these
conditions. Thus "in creatures sore
bested by the environment" when in-
stinct and impulse fail, reason rises to
insure safety. At last with the civilized
man reason comes to be a chief ele-
ment in guiding the choice of life.—

ular Science Monthly.

Lively Amazons.

When the Scotch Highlanders were
landed in Crete the other day as one of
England's contributions toward the "pa-
cification" of that island, an astonished
resident of Candia is said to have ex-
claimed: "If the men dress like this
how do the women dress?" This anec-
dote has recalled one that dates from
Balaklava. After the battle a Russian
general asked an English prisoner who
and what the queerly dressed soldiers
were those "thin red line" had so con-
temptuously repulsed a charge of the
Russian cavalry. Instead of answering
that they were Sir Colin's Highlanders,
the man replied: "Those? Oh, those
are the wives of the men on gray
horses." The "men on gray horses," of
course, were the Scots Greys, who had
the same day taken part in the charge
of Scarslett's heavy brigade and scat-
tered a huge inert mass of Russian cav-
alrymen.—N. Y. Times.

A SCIENTIST SAVED.

President Barnaby, of Hartsville College, survives a serious illness through the aid of Dr. Williams' Pink Pills for Pale People.

From the Republican, Columbus, Ind.

The Hartsville College, situated at Hartsville, Indiana, was founded years ago in the interest of the United Brethren Church, when the state was mostly a wilderness, and colleges were scarce. The college is well known throughout the country, former students having gone into all parts of the world.

PROF. ALVIN P. BARNABY.

A reporter recently called at this famous seat of learning and was shown into the room of the President, Prof. Alvin P. Barnaby. When last seen by the reporter Prof. Barnaby was in delicate health. To-day he was apparently in the best of health. In response to an inquiry the professor said:

"Oh, yes, I am much better than for some time. I am now in perfect health; but my recovery was brought about in rather a peculiar way."

"Tell me about it," said the reporter.

"Well, to begin at the beginning," said the professor, "I studied too hard when at school, endeavoring to educate myself for the professions. After completing the common course I came here, and graduated from the theological course. I entered the ministry and accepted the charge of a United Brethren Church at a small place in Kent County, Mich. Being of an ambitious nature, I applied myself diligently to my work and studies. In time I noticed that my health was failing. My trouble was indigestion, and this with other troubles brought on nervousness."

"My physician prescribed for me for some time, and advised me to take a change of climate. I did as requested and was some improved. Soon after I came here as a professor in physics and chemistry, and later was financial agent of this college. The change agreed with me, and for awhile my health was better, but my duties were heavy, and again I found my trouble returning. This time it was more severe and in the winter I became completely prostrated. I tried various medicines and different physicians. Finally I was able to return to my duties. Last spring I was elected president of the college. Again I had considerable work, and the trouble, which had not been entirely cured, began to affect me, and last fall I collapsed. I had different doctors, but none did me any good. Professor Bowman, who is professor of natural science, told me of his experience with Dr. Williams' Pink Pills for Pale People, and urged me to try them a trial, because they had benefited him in a similar case, and I concluded to try them."

"The first box helped me, and the second gave great relief, such as I had never experienced from the treatment of any physician. After using six boxes of the medicine I was entirely cured. To-day I am perfectly well. I feel better and stronger than for years. I certainly recommend this medicine."

To allay all doubt Prof. Barnaby cheerfully made an affidavit before LYMAN J. SCUDDER, Notary Public.

Dr. Williams' Pink Pills for Pale People are sold by all dealers, or will be sent post-paid on receipt of price, 50 cents a box or six boxes for \$2.50 (they are never sold in bulk, or by the 100), by addressing Dr. Williams' Medicine Co., Schenectady, N. Y.

A THOUGHT THAT KILLED A MAN!

HE thought that he could trifle with disease. He was run down in health, felt tired and worn out, complained of dizziness, biliousness, backaches and headaches. His liver and kidneys were out of order. He thought to get well by dosing himself with cheap remedies. And then came the ending. He fell a victim to Bright's disease! The money he ought to have invested in a safe, reliable remedy went for a tombstone.

Convincing Talk Between a Farmer and a Money Lender.

The following conversation between a Wisconsin farmer, in Calumet county, and a money-lender, not a regular banker, but one of those men of means who make out all of their own papers and manage to get as much out of a loan as possible, including the highest notch in the matter of interest, is not only of interest to the friends of good roads, but is very convincing.

"I have dropped in to collect the interest on that mortgage, Mr. Williams," remarked the boot-leg banker.

"I'm ready for you, but in order to be ready I had to sell a couple of cows. Here is something I have been reading with a good deal of interest. Look it over while I get the money for you."

When Mr. Williams returned, he asked his neighbor how he liked the article.

"O, I guess it's as good as any of the good roads stuff they are printing these

LOOK IT OVER WHILE I GET THE MONEY.

times. I don't take any stock in any of it. The roads are good enough for me. I don't want to be called upon to help make them any better."

"We differ. I take deep interest in the good roads discussion. The roads are not good enough for me. I want to help make them better. If we had good roads the past 20 years I would not now be paying you interest on this mortgage on my farm."

"Talk sense, man. Has this good roads agitation turned your head, too. You talk just as two or three of your neighbors do."

"Thank you; I'm glad to hear it. It is a sign that they, too, have been doing some thinking."

"How would good roads have bettered your condition?"

"I cannot take time to tell you all of the ways in which they would have helped me. Here are a few of the ways: I have owned this farm for 25 years. For 15 years it has been a good farm for you. I have paid you interest enough to have sent my son and daughter through college. You ask what that has to do about good roads. It has this to do: I have figured that if we had maintained a system of good roads it would have cost me half as much to market my products. It would have been done with half of the teams, half of the hired men, less than half of the cost in wagons. The wagons I have wrecked on our bad roads the past 25 years cost me, when new, \$1,470. Some of them might have failed on good roads, but it is safe to say that my loss on wagons alone was \$1,200 more than it would have been on reasonably good roads. I figure that the extra teams and their living, cost me \$3,000, and the hired help—more than I would have had if the roads had been such as that paper tells about—has cost me \$4,000. Every man of mature judgment ought to know that if we had good roads about here, and especially between here and the cities to the right and left, where most of our products are marketed, and where we do most of our trading, and in one of which we attend church, and where our sons and daughters go to high school, this farm would be worth double what it is now, and I call it worth \$10,000 at present. That is \$10,000 more that would have been added to my savings by good roads. That makes my loss over \$18,000, a good deal more than I am worth to-day. My bright boy and girl must go without the college education I had hoped to give them and could have given if I had had the benefits to be derived from good roads. I see why you do not want a change. Your business as a money-lender would end with an era of good roads. Farmers would save enough by them to become bank depositors instead of borrowers. I'm anxious for good roads. You, too, would be, I guess, if bad roads had cost you nearly \$20,000."

It was an unanswerable argument and the money-lender admitted as much by departing without saying another word.

Turnips Hurt Milk Flavor.

At the Iowa station it was found that turnips injure the flavor of both milk and butter. This injury is due to volatile acids, which can be driven off by heating the milk to 160 degrees for a short time. Beets increased the milk and butter product, and caused all the cows, even Jerseys, to lay on fat quite rapidly. When the roots were discontinued butter fat decreased and the cows ceased to gain weight, and it took more pounds of feed (calculated to dry matter) to produce a pound of butter. When turned on pasture there was immediate increase of milk, butter and live weight. Feeding bran during part of the grazing period produced sufficient gain to yield a small profit.

A prominent dairy journal states that "if tuberculosis is a germ disease, as all authorities have come to accept, then it cannot be hereditary."

AN EXCELLENT FOOD.

Artichokes Possess More Nutritive Value Than Other Roots.

The wonderful productiveness and ease with which the improved variety can be produced is always a surprise the first time to those who cultivate them. They are an excellent food for cattle, sheep and horses, and one of the cheapest and healthiest hog foods raised, and for milk cows they excel any root I ever fed for increasing the flow and making the milk much richer. Last winter this variety was tested at the Fremont creamery on a small scale and the report was very good. Chemical analysis proves that the artichoke isn't behind in nutrition, compared with other roots:

Carrot	Flesh Forms	Fat Forms	%
Turnips	"	"	12
Sugar beet	"	"	9
Mangelwurzel	"	"	10
White turnip	"	"	4
Artichoke	"	"	10

The above is taken from the American Corn and Hog Journal. The nutrition of an artichoke is in the form of sugar, therefore always ready for use on the part of the eater. One acre will keep from 20 to 30 head of hogs during the winter months. I find that low black soil, land which is too frosty for many crops, is fine soil for the artichoke, for freezing will not injure them.

They often yield on good land as high as 800 bushels per acre. There is a vast difference in artichokes. The native or wild kind is worthless, while the improved variety is of great value. I grow the improved white French, grown largely in France for domestic use as well as for stock. Some time ago they were introduced into this country and close cultivation has proven them to be a sure and profitable crop for this country.

I have been experimenting with them for over five years in the way of cultivating, harvesting, feeding and keeping over winter. They are very profitable because no insect, blight or rust has yet struck them, and the tops make a fodder superior to corn when properly handled. I find keeping them through winter is a difficult thing to do without having them spoil, unless a person understands it. I will give my method. I pick out a dry spot and dig a pit not over ten inches deep and about five feet wide, and as long as convenient. Then I pile the tubers up to a peak, putting on a shallow layer of straw and not over five inches of dirt. If more dirt is put on they will surely heat and spoil, and if they freeze solid it will not injure the growing or feeding qualities; it makes them sweeter and better.—J. H. Van Ness, in Ohio Farmer.

FOR RAISING WATER.

Pulley Rigged Over the Well Saves Lots of Hard Work.

On many farms the water is raised from the well by a bucket and rope. A great aid in such a case is a pulley

PULLEY SAVES LOTS OF WORK.

rigged above the opening in the platform. These pulleys can be bought for a trifle at the hardware store. The larger the pulley, the easier, of course, will the water be drawn. A light framework can quickly be built above the well in the manner shown, for the attachment of the pulley.—N. Y. Tribune.

DAIRY SUGGESTIONS.

Continue feeding milk cows for some time after turning on the pastures. Milk is elaborated from the blood as it passes through the glands of the udder.

Souring milk is a process of thickening, which finds its complete fulfillment in lopped milk.

Oleomargarine has displaced \$88,000,000 worth of pure butter in the United States. How much has it enhanced the price of beef tallow, its chief ingredient?

What is claimed as the champion dairy cow of the world is a Shorthorn named Honeycomb, bred by John Lindsay, of Kilmah Park, Ummadoran, New South Wales, Australia. The record claimed for her is 84½ pounds of milk in 24 hours, yielding 4½ pounds of butter.

Calves intended for the dairy ought never to be fed in such a manner as to accumulate fat or to establish a predisposition to lay on fat. They need food that will form bone and muscle to expand their frames and fit them to take and digest large quantities of food during their future lives.—Rural World.

Trade in Bogus Butter.

The commissioner of internal revenue reports that in nine years 440,000,000 pounds of oleomargarine have been made and sold in this country. This bogus product has taken the place of butter to the value of about \$88,000,000. And it is safe to say that nine pounds in every ten have been consumed under the impression that it was butter. Some cattlemen denounce laws restricting the sale and use of oleomargarine and declare that the manufacture of the stuff adds quite a sum to the value of every animal sold. One who can believe that oleo has added \$88,000,000 to the value of cattle in nine years can believe anything, with or without evidence.—Dakota Field and Farm.

RECEPTACLES FOR PLANTS.

Large Wooden Fern Bowls and Vases Are Effective.

In either drawing-rooms or halls where the color is sufficiently subdued well-grown plants of the pretty yellow Genista, set in large Tokanabi-ware pots and on raised stands of the same faience, or any dark oriental pedestal, give a very glowing and brilliant decoration. Very deep blue jardenieres filled with growing plants of the dwarf Japanese spirea, with its dark, peculiar leaves and creamy, tapering spikes of bloom, are very lovely.

Shallow tints painted green, and containing wet mud or well-packed spagnum fitted on to an ordinary old-fashioned mantelpiece make an excellent basis for effective arrangements, especially if, as is so often the case in old houses, a mirror covers the chimney piece. They should have a back five inches high and sides tapering down to two and a half inches in front. A dense network of galvanized wire helps to support weak-stemmed or drooping flowers, and holes clipped in this netting at intervals will admit pots which vary the surface gracefully.

Gilded baskets are also very useful and effective. At any basket-shop you can choose graceful and beautiful shapes and have them gilded or painted in white and gold; let the tinsmith fit a movable lining to hold water and you have most fascinating, unconventional repositories for your flowers. The green rush baskets so prepared as to hold water are also most satisfactory and harmonious, and those who have only seen them bedecked with glittering satin ribbons ready for presentation on the steamers or over the foot-lights can scarcely credit the peculiar natural effects they have when treated artistically by a home flower-lover. They can be made to look as if you had plucked some rushes with the flowers and woven them together to suit your purpose then and there.

Common wooden bowls can be made into extraordinarily pretty receptacles for flowers by coating them with glue and pressing upon their sides pieces of the green "velvet" moss now so beautiful in the woods. The moss should be lifted very carefully and as little broken as possible. If done carefully, though the moss will lose some of its vividness, it will continue green all summer. A large bowl, say ten inches in diameter, hung in a "French window" or in an archway by four green cords, and filled gracefully with ferns and roses or any summer growth, makes a beautiful object in cottages of moderate pretensions. It should hang low enough for the flowers to be on a level with the eye. In a quaint cottage, the descriptive name of which was "Ivy Nook," a bowl of this sort, but doubtless 14 inches in diameter, hung from the center of the low-ceiled parlor, the windows of which were diamond-paned. Quaintness and simplicity were the chief characteristics of this room, and this swinging green cup, with the large mass of flowers it so easily held, was very harmonious. Filled with clusters of the Japanese monthly honeysuckle and mignonette, and bordered with wild ferns, it was really unique and very beautiful.

For midsummer tables ferns are always pretty, and small vases holding each a four-inch pot of "maiden's hair" make an ever fresh and cool-looking adornment. On a stately old table of nearly black rosewood, last June, I greatly admired a large center silver vase of Greek form, in which ferns were growing, while scattered about the table were little pitholders of white earthenware made in imitation of osier baskets, with well-grown small plants of native "maiden's hair" taken from a neighboring wood.—N. Y. Post.

The Sacredness of Prayer Rugs.

Verses from the Koran and other passages considered sacred are generally stamped on fabrics used as prayer rugs by the Mohammedans, and it is criminal in oriental law to export such pieces. This is doubtless because use by the occidentals means the treading of sacred words under infidel feet, and when you think it over, it is not to be wondered at. A few years ago an American succeeded in getting two such pieces as near home as Paris, but the inducements offered him to return them to the oriental dealer were potent enough to effect their purpose.

DOCTORS HAD GIVEN HER UP.

A Convincing Letter From One of Mrs. Pinkham's Admirers.

No woman can look fresh and fair who is suffering from displacement of the womb. It is ridiculous to suppose that such a difficulty can be cured by an artificial support like a pessary.

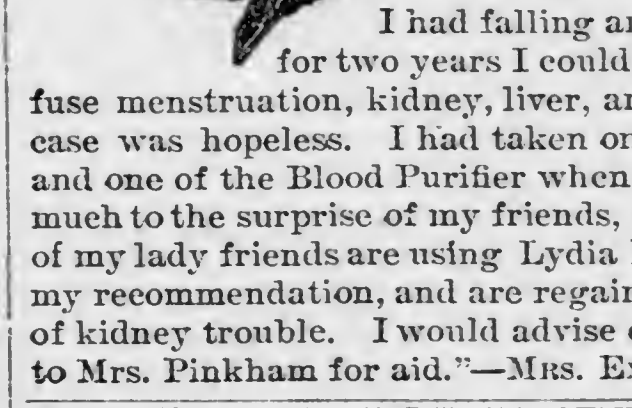

Artificial supports make matters worse, for they take away all the chance of the ligaments recovering their vigor and tone. Use strengtheners; the ligaments have a work to do.

If they grow flabby and refuse to hold the womb in place, there is but one remedy, and that is to strengthen their fibres and draw the cords back into their normal condition, thus righting the position of the womb.

Lydia E. Pinkham's Vegetable Compound is designed especially for this purpose, and, taken in connection with her Sanative Wash, applied locally, will tone up the uterine system, strengthening the cords or ligaments which hold up the womb.

Any woman who suspects that she has this trouble—and she will know it by a dragging weight in the lower abdomen, irritability of the bladder and rectum, great fatigue in walking, and leucorrhœa—should promptly commence the use of Lydia E. Pinkham's Vegetable Compound. If the case is stubborn, write to Mrs. Pinkham, Lynn, Mass., stating freely all symptoms. You will receive a prompt letter of advice free of charge. All letters are read and answered by women only. The following letter relates to an unusually severe case of displacement of the womb, which was cured by the Pinkham remedies. Surely it is convincing:

"Lydia E. Pinkham's Vegetable Compound and Blood Purifier cured me when the doctors had given me up. I had spent hundreds of dollars searching for a cure, but found little or no relief until I began the Pinkham remedies. I had falling and displacement of the womb so badly that for two years I could not walk across the floor. I also had profuse menstruation, kidney, liver, and stomach trouble. The doctors said my case was hopeless. I had taken only four bottles of the Vegetable Compound and one of the Blood Purifier when I felt like a new person. I am now cured, much to the surprise of my friends, for they all gave me up to die. Now many of my lady friends are using Lydia E. Pinkham's Vegetable Compound through my recommendation, and are regaining health. It has also cured my little son of kidney trouble. I would advise every suffering woman in the land to write to Mrs. Pinkham for aid."—Mrs. EMMA PANGBORN, Alanson, Mich.

ABSENT-MINDED.

This Man Carried a Lighted Lamp Several Blocks.

An amusing case of absent-mindedness was experienced by a young southsider the other evening, says the Pittsburgh Chronicle-Telegraph. The young man is usually of a bright nature, but for some time past his friends have been noticing that he does some peculiar things. Not long ago he was at a reception, and a few minutes before closing time he went to the coat box and secured his hat and coat. Then he walked upstairs to the dancing floor and picked up another coat and walked home with it on his arm. Arriving at his home he found that he had one coat on and another on his arm. The next day he found the owner of the extra coat and mutual explanations followed and all was well. But that has been eclipsed by his latest exploits. He had finished his toilet and started for the street. As soon as he made his appearance he was greeted with smiles from everybody who saw him. He walked down the street and could not imagine what made the passers-by smile at him. Finally he reached the restaurant where he takes his meals, then he realized that he was carrying something in his hand. He looked at it and found that he had carried the lighted lamp from his room and had walked several blocks along the main street with it in his hand.

Another case is cited concerning the same young man. At the office where he is employed he has occasion to answer many calls at the telephone. One evening he was reading a book in his room when an alarm clock rang in an adjoining room. The absent-minded youth got up and commenced to yell "Hello! Hello!" and when the occupant of the other room inquired as to the cause of the yelling the young man said in a sheepish manner: "Oh, I thought it was the telephone bell ringing."

Melting by Electricity.

Prof. Elihu Thompson, an eminent authority on electric metal-working, believes that there is no doubt whatever of the possibility of melting through masses of iron and steel of even considerable thickness, provided there is time enough to do it and sufficient current is available; but he thinks the paraphernalia which the burglar would have to carry along and haul at his disposal for the attempted work would be a sufficient discouragement in itself, while the time required and the risk of discovery would be so great as to remove the operation from among the possibilities.

Deafness Cannot Be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube gets inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars free.

When I was a boy I was troubled with dropsy, my legs swelling until I could not walk and finally bursting open and becoming running sores. The doctors gave me up and said I could not live. At this time I began to use Ayer's Sarsaparilla and after taking fourteen bottles I was able to get out and go to work. My leg is still tender and at times somewhat sore but I have no hesitancy in saying Ayer's Sarsaparilla saved my life.—J. F. HAZEL, Tallulah, La., Nov. 21, 1895.

The Gay And Festive Floater.

An exchange prints the following timely lines:

Behold the day of election draweth nigh, when the gay and festive floater is seen in all his glory. Even now he scentheth the flesh-pots from afar off, and moveth in the direction thereof. He seeketh out a candidate here and a candidate there, and he telleth each of much work that needeth to be done. The candidate taketh him to one side and the palm of his hand is greased, and the floater floateth to another candidate and telleth him of a "bunch" he can handle or a "nest" he can fix. He plucketh the coin from the hand of his boss, and in his heart saith "All men are fools." He leaveth town, and in the pocket of his trousers is concealed the money of rival candidates. He fooleth them all, for on election day he walketh into the booth and stampeth in the place of his own choice, and no man is any the wiser.

C. F. Clay is a horse of great finish and style, in fact as much so as any horse we know of. Is a beautiful mahogany bay, with black points, and stands 15.3 hands high. His pedigree is full of the richest producing blood which has year after year added new and brilliant performers to the turf, for instance: Nannie Etticoat, out of his dam, has given in 1896 Red Silk 2:10 and Brown Silk 2:19, the latter the dam of China Silk, two-year-old record 2:16; beyond question the best two-year-old filly of 1896. As a two, three and five-year-old, C. F. Clay was campaigned and landed many good races, securing his record of 2:18. His first crop of foals came in his six-year-old form and for several years afterward he was the leading sire, when age of foals was considered. His get all possess his grand individuality and are especially speedy; and as to race-horse qualities the performances of Coleridge 2:05; Choral 2:08; Connor 2:14; Arthur W. 2:14; and others are too recent and of too much merit to need any comment. But few better sires than C. F. Clay are now in the stud. His colts are not only trotters but are show horses as well, having probably been awarded as many premiums at the leading fairs as the get of any horse in Kentucky. C. F. Clay will make the season of 1897 at Emerald Park Stock Farm, 5 1/2 miles north of Paris, at

An Established
DRY GOODS BUSINESS
FOR SALE.

The old and well-known firm of
Smedley & Butler, of Millersburg, Ky.,
is now in progress of liquidation owing
to the assignment of J. G. Smedley.
All of the large stock of dry goods,
notions, fancy goods, domestics, boots,
shoes, hats, caps and every article kept
by a first-class store is now being offered
at cost for cash. This is a fine oppor-
tunity for any one wishing to engage in
the dry goods business and assume con-
trol of a house already established and
well-known throughout Central Ken-
tucky. Any one wishing to buy the
stock as a whole should address

ALEX BUTLER,
Of the firm of Smedley & Butler,
Millersburg, Ky.
